# ABOUT THE COMPANY

**TOMODO** Ltd. was founded in 2013 and is based in Tel Aviv, Israel.

**TOMODO** develops one of a kind unique technology for web modification & augmentation.

**TOMODO**'s technology enables the creation of new websites by modifying any existing website. Thousands of developers and designers have created & published thousands of modified websites using TOMODO's platform since it was launched in April 2013.

For more information, contact us at [info@tomodo.com](mailto:info@tomodo.com) or visit [tomodo.com](http://tomodo.com).

**TOMODO in one line:**

**TOMODO** enables anyone to modify any existing website, and publish the modified version under a new domain.

**What is TOMODO?**

**TOMODO** is a platform that enables anyone to modify any existing website, and publish the modified version under a new domain. The new domain is easily accessible to anyone, from any browser device or platform, by simply entering its URL.

**TOMODO** developed the unique patent pending technology to create these modified websites. It does not copy or scrape the content. **TOMODO** act as a real-time proxy between the user and the original website. Thus, every action on the modified website counts as an action on the original website, leaving the original website owner in full control of the original content.
